

# DON'T KILL AN OCEAN JUST TO KEEP A FEW PESTS OUT OF YOUR GARDEN.

Overuse of pesticides  
pollutes our watershed,  
and ends up in the ocean.

This is bad.

You may also be killing  
lots of innocent, even  
helpful bugs in your garden.

That's bad too.

On top of all that,  
it wastes your money.

Don't do it.

COMMUNITY FOR A  
CLEAN WATERSHED

**THE WATERSHED SHOULD ONLY SHED WATER**
